2. The following is an examiner's statement of reasons for allowance: The translated claims priority to German patent application DE 100 25 678.3 filed May 24, 2000 has overcome the closet prior art, Gutta et al. [US 6,424,272] filed March 30, 2001.

The present invention is directed to a device for detecting road users and obstacles as a function of camera images to determine their distance from an observer, and to classify them, the nonobvious independent claims identify the uniquely distinct features: a first classifying unit interposed between the distance sensor unit and the mono-image camera, and a second classifying unit downstream from the sensor unit and the camera, a long with the claimed manner. There is neither singularly or in combination prior art(s) would anticipate or render the above limitations obvious .
